Given the `head` of a sorted linked list, *delete all duplicates such that each element appears only once*. Return the linked list **sorted** as well.

Example 1:

Input: `head = [1,1,2]`

Output: `[1,2]`

Example 2:

Input: head = [1,1,2,3,3]

Output: [1,2,3]

Constraints:

- The number of nodes in the list is in the range `[0, 300]`.
- `-100 <= Node.val <= 100`
- The list is guaranteed to be **sorted** in ascending order.
