## Ciel and Receipt

Problem Code: **CIELRCPT**

Submit

Tomya is a girl. She loves Chef Ciel very much.

Tomya like a positive integer **p**, and now she wants to get a receipt of Ciel's restaurant whose total price is exactly **p**. The current menus of Ciel's restaurant are shown the following table.

Name of Menu	price
eel flavored water	1
deep-fried eel bones	2
clear soup made with eel livers	4
grilled eel livers served with grated radish	8
savory egg custard with eel	16
eel fried rice (S)	32
eel fried rice (L)	64
grilled eel wrapped in cooked egg	128
eel curry rice	256
grilled eel over rice	512
deluxe grilled eel over rice	1024
eel full-course	2048

Note that the *i*-th menu has the price  $2^{i-1}$  ( $1 \leq i \leq 12$ ).

Since Tomya is a pretty girl, she cannot eat a lot. So please find the minimum number of menus whose total price is exactly **p**. Note that if she orders the same menu twice, then it is considered as two menus are ordered. (See **Explanations** for details)

### Input

The first line contains an integer **T**, the number of test cases. Then **T** test cases follow. Each test case contains an integer **p**.

### Output

For each test case, print the minimum number of menus whose total price is exactly **p**.

### Constraints

$$1 \leq T \leq 5$$

$$1 \leq p \leq 100000 \ (10^5)$$

There exists combinations of menus whose total price is exactly **p**.

### Sample Input

```
4
10
256
255
4096
```

### Sample Output

```
2
1
8
2
```

### Explanations

In the first sample, examples of the menus whose total price is 10 are the following:

$$1+1+1+1+1+1+1+1 = 10 \text{ (10 menus)}$$

$$1+1+1+1+1+1+1+2 = 10 \text{ (9 menus)}$$

$$2+2+2+2 = 10 \text{ (5 menus)}$$

$$2+4+4 = 10 \text{ (3 menus)}$$

$$2+8 = 10 \text{ (2 menus)}$$

Here the minimum number of menus is 2.

In the last sample, the optimal way is  $2048+2048=4096$  (2 menus). Note that there is no menu whose price is 4096.

All submissions for this problem are available.

#### CodeChef - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of **algorithms**, **computer programming**, and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and two smaller programming challenges at the middle and end of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

#### Practice Section - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in the language of your choice. Our **programming contest** judge accepts solutions in over 55+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

#### Compete - Monthly Programming Contests, Cook-off and Lunchtime

Here is where you can show off your **computer programming skills**. Take part in our 10 days long monthly coding contest and the shorter format Cook-off and Lunchtime **coding contests**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
