

Level order traversal

Easy Accuracy: 49.61% Submissions: 79495 Points: 2

Given a binary tree, find its level order traversal.

Level order traversal of a tree is [breadth-first traversal](#) for the tree.

Example 1:

Input :

Output: 1 3 2

Example 2:

Input :

Output: 10 20 30 40 60 N N

Your Task:

You don't have to take any input. Complete the function **levelOrder()** that takes the root node as input parameter and returns a list of integers containing the level order traversal of the given Binary Tree.

Expected Time Complexity: $O(N)$

Expected Auxiliary Space: $O(N)$

Constraints:

$1 \leq \text{Number of nodes} \leq 10^5$

$1 \leq \text{Data of a node} \leq 10^5$
