Hotel Bytelandia

Problem Code: **HOTEL**

Submit

A holiday weekend is coming up, and Hotel Bytelandia needs to find out if it has enough rooms to accommodate all potential guests. A number of guests have made reservations. Each reservation consists of an arrival time, and a departure time. The hotel management has hired you to calculate the maximum number of guests that will be at the hotel simultaneously. Note that if one guest arrives at the same time another leaves, they are never considered to be at the hotel simultaneously (see the second example).

Input

Input will begin with an integer T, the number of test cases. Each test case begins with an integer N, the number of guests. Two lines follow, each with exactly N positive integers. The i-th integer of the first line is the arrival time of the i-th guest, and the i-th integer of the second line is the departure time of the i-th guest (which will be strictly greater than the arrival time).

Output

For each test case, print the maximum number of guests that are simultaneously at the hotel.

Sample Input

```
3
3
1 2 3
4 5 6
5
1 2 3 4 5
2 3 4 5 6
7
13 6 5 8 2 10 12
19 18 6 9 9 11 15
```

Sample Output

```
3
1
3
```

Constraints

- $T \leq 100$
- $N \leq 100$
- All arrival/departure times will be between 1 and 1000, inclusive

CodeChef - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of **algorithms**, **computer programming**, and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and two smaller programming challenges at the middle and end of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

Practice Section - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in the language of your choice. Our **programming contest** judge accepts solutions in over 55+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

Compete - Monthly Programming Contests, Cook-off and Lunchtime

Here is where you can show off your **computer programming skills**. Take part in our 10 days long monthly coding contest and the shorter format Cook-off and Lunchtime **coding contests**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
